A closer look at the year’s biggest fitness trends—what’s coming, why they matter, and how to make them part of your business strategy.
Just as 2020 created new paths to connection and wellness, 2021 reinforced the need to make those paths sustainable.

It’s fair to say that life heading into 2022 may look different than expected, but there’s still plenty of room for reimagining along the way—especially for the fitness industry.

As one of the industry’s most comprehensive studies, our 2022 Wellness Index asked more than 16,000 Americans from major US cities about their wellness habits. A clear majority now see wellness as worth prioritizing in life, and they’re willing to put the time in to do it. Fitness brands that support all dimensions of wellness will reap the biggest benefits in the year ahead.

Let’s dive into the results.
In the minds of consumers, “wellness” now encompasses a whole lot more than just being in shape. It’s reducing stress. It’s finding a sense of community and belonging. It spans mental, physical, and spiritual dimensions—and consumers actually prioritized mental wellness above them all.

This is where we see the pandemic’s lasting effect on consumer behavior—even their overall outlook on life. Wellness now speaks to an overall improvement in quality of life, a lifestyle that makes room for things that really matter.

78% say wellness is more important than ever.
Reasons people are more focused on health and wellness:

01 I want to improve my health

02 I want to live a long and healthy life

03 I want to be healthy so I can focus on other things
Consumers realize wellness isn’t comprised of fitness alone—when asked to rate the dimensions most important to their overall wellness routines, they said:

01 MENTAL WELLNESS
02 PHYSICAL WELLNESS
03 SPIRITUAL WELLNESS
| SECTION 01 | The pandemic continues to have an impact |
| SECTION 02 | Deeper motivations for movement |
| SECTION 03 | Consumers seek variety in their fitness and wellness routines |
| SECTION 04 | Breaking down barriers |
| SECTION 05 | Virtual fitness is here to stay |
| SECTION 06 | Recovery is on the rise |
| SECTION 07 | Music is the ultimate motivator |
The pandemic continues to have an impact.
The pandemic continues to have an impact

The repercussions of COVID-19 are far-reaching. Half of consumers say the pandemic has negatively impacted their mental wellbeing, with women and younger generations being the most affected.

Women's mental wellbeing was more affected by the pandemic:

- Women: 51%
- Men: 46%
Younger generations’ mental wellbeing took the biggest hit from the pandemic

- **57%** for **Gen Z** (ages 18-24)
- **53%** for **Millennial** (ages 25-40)
- **46%** for **Gen X** (ages 41-56)
- **37%** for **Young Boomer** (ages 57-65)

The pandemic has negatively impacted my mental wellbeing
40% of consumers say the pandemic has negatively impacted their *physical* health

This is especially true for Millennials and Gen Z

- **GEN Z** (ages 18-24): 42%
- **MILLENNIAL** (ages 25-40): 44%
- **GEN X** (ages 41-56): 39%
- **YOUNG BOOMERS** (ages 57-65): 32%

The pandemic has negatively impacted my physical health
The vaccination status of your staff is important to a majority of Americans

- **GEN Z** (ages 18-24): 55%
- **MILLENIAL** (ages 25-40): 57%
- **GEN X** (ages 41-56): 51%
- **YOUNG BOOMER** (ages 57-65): 53%

I am more comfortable going to fitness establishments when I know the staff is fully vaccinated.
TAKEAWAY:

Consider how you might approach your community differently during this time. For example, think about incorporating deeper motivations and mental health benefits into your messaging. You might even add breathwork or mindset workshops to your schedule.

Also, a majority of people of all ages are more comfortable interacting with fully vaccinated staff, with younger generations reporting the most likelihood to say so. If your staff is fully vaccinated, make that clear to your customers.

How Mindbody can support you:

Track vaccination status in your software.
Deeper motivations for movement.

SECTION 02
Deeper motivations for movement

It’s not just a workout—and consumers know that. So, why do Americans prioritize fitness? Stress reduction and mental health top the list, which, after the past couple of years, is understandable. And with 45% of Americans reporting feeling stressed on a regular basis, there’s a significant opportunity for the fitness industry to make a positive impact.

77% of consumers say being physically active helps their mental health.
The top reasons people work out has changed

Top reasons people exercised pre-pandemic:
1. Control weight (35%)
2. Feel good (33%)
3. Live a long and healthy life (32%)

Top reasons people exercise today:
1. Reduce stress (43%)
2. Feel better mentally (43%)
3. Look better physically (39%)
TAKEAWAY:

Today’s consumers are more focused on feeling better mentally than on how they look. Because those motivations are deeper than just improving physical appearance, it may well give wellness habits more staying power. If your marketing hasn’t shifted to account for that, it’s time to rethink the message you’re putting out there. Rather than messages that focus on “getting in shape” or “losing weight,” leading with the mental health benefits of exercise may resonate more.
Consumers seek variety in their fitness and wellness routines.
Consumers seek variety in their fitness and wellness routines

We can’t say this strongly enough: Consumers have expanded their definition of wellness. Fitness will always be a cornerstone, but the savviest fitness businesses will be the ones who shake up the norms and become a venue for supporting other dimensions of wellness.

Not surprisingly, consumers are interested in bolstering their immune health. Nearly half (46%) of Americans are interested in trying new services or treatments that support immune health moving forward—women being more interested than men. This presents opportunities for immune-boosting services and education on topics like nutrition, sleep, and stress reduction—all foundations of strong immune health.

Americans are also focused on intellectual wellness. In fact, more than a quarter of Americans ranked intellectual wellness in the top three most important dimensions. Over a third said they would be interested in yoga classes that involve art therapy like coloring or pottery.
A strong majority of people also prefer a fitness studio or gym with a variety of workouts available—with men citing it as slightly more influential than women (69% versus 64%).* 

A gym with a variety of workout options available is more influential on men than women.

TAKEAWAY:

Try new things! Offer writing workshops, painting classes, or meditation in addition to your day-to-day offerings. You might consider these as community-building events at your business. Be smart about it: Don’t go all in until you’ve tested it by promoting specific events and gauged the turnout and the level of enthusiasm.

This won’t be a one-size-fits-all kind of thing. Maybe a series of workshops on nutrition is the right vibe for your members; maybe it’s partnering with other businesses in your area. Remember that expanding what you offer is also a great way to expand your sales funnel.

How Mindbody can support you:

Attract variety-seekers and introduce them to your services with ClassPass.
Upgrade or add equipment to support new services with Mindbody Capital.
Breaking down barriers

Although the benefits of fitness have become increasingly more evident, there are still a variety of barriers to entry. Expense, concerns about cleanliness, and gymtimidation are among the top reasons consumers don’t attend gyms or fitness studios.

TOP REASONS PEOPLE DON’T GO TO GYMS/FITNESS STUDIOS:

1. Too expensive
2. Worry about COVID-19 cleanliness
3. Don’t have time
4. Feel too intimidated

12% Feel too intimidated to go to a gym/fitness studio in 2021 → 19% Feel too intimidated to go to a gym/fitness studio in 2022
Being in shape and representation are most impactful on gymtimidation

- Getting in better shape first: 55%
- Seeing more people like me in the gym/studio and in their promotions: 48%
- Seeing that the gym/studio supports diverse populations: 31%

What would make you less intimidated in going to a studio/gym?
TAKEAWAY:

None of these barriers are insurmountable. It’s about developing a business strategy for addressing them—and then following through.

- If you’ve heard time is a barrier for your clients, try experimenting with the duration of your classes.
- If gymtimidation seems like a real factor that’s lowering attendance, try intro offers that start with a virtual class package and then work up to hybrid or in-person classes. Offer educational workshops or classes for newcomers or promote small group classes and personal training to help people get started with new fitness routines.
- Adjust your messaging to make sure you’re getting credit for all the COVID-19 protocols you observe and think about how to authentically feature the diverse populations you serve in your social and other marketing channels.

How Mindbody can support you:
Automate your messaging to keep new clients motivated and connected with Marketing Suite.
Virtual remains a strong acquisition and retention tool.
Virtual remains a strong acquisition and retention tool

In-person fitness may have returned, but Americans continue to seek out virtual workouts, too. For many, virtual workouts are simply an extension of a brand they’re already engaging with. In fact, a quarter of those who participate in virtual workouts do so with the gym/studio they currently attend.

Virtual also proves to be a great way to try out new class types. Over a third of consumers started going to an in-person fitness class they discovered virtually.

35% of Americans started going to an in-person fitness class they discovered through virtual fitness.
Millennials are *most likely* to attend in-person classes they tried virtually.
If you’re worried that virtual or streaming classes are a barrier to in-person attendance, it’s not. There’s good evidence to suggest that it’s actually a way to break down barriers to new fitness disciplines and assuage those “I’ve never tried this before!” fears. In addition, it’s an avenue to stay connected with your community even when they’re not in your studio.

Beyond that, virtual fitness is absolutely here to stay. Curbside pickup began as a pandemic adaptation for restaurants—now it’s a basic expectation. Virtual fitness is increasingly viewed the same way.

How Mindbody can support you:

Seamlessly integrate streaming classes and video on demand offerings via the Virtual Wellness Platform.
Recovery services are on the rise. Recovery services are on the rise. Recovery services are on the rise.
Recovery services are on the rise

Recovery is arguably just as important as the workout itself—and an increasing number of consumers agree. Some 44% of Americans say workout recovery is important. Men are more likely than women (32% versus 24%) to engage in recovery services like massage, cryotherapy, ice bath, and sauna.

Men are more likely to engage in recovery services post-workout than women.

I regularly engage in recovery services post workout (i.e., massage, compression, cryotherapy, ice bath, sauna, etc.)
TAKEAWAY:

A sizable portion of consumers say the “after workout” is important enough to build a regular routine around. If you can give your loyal members more reasons to spend time with you—and increase their longevity with your business—that’s always a quick(er) win than attracting new clients.

Think about how you can capitalize on the trend. Create recovery-oriented classes. Add short online recovery workouts to your streaming offerings. If you want to incorporate something outside your area of expertise, consider co-promoting. Partnerships with other local businesses are always a win-win, because you’re both incentivized to send business to each other.
Music is the ultimate motivator.
Music is the ultimate motivator

The right music can make a good class a great one—and keep consumers coming back for more.

Over 40% of consumers say they discover new music through their fitness routines.

Music motivates 71% of consumers while working out.
TAKEAWAY:

Don’t leave your music selection to chance. Connect with your community to see how your choices are resonating. If it’s not, it’s time to adjust.

Think of music as another way to build community in your gym or studio. If your members always rock out to your instructors’ playlists, ask your instructors to make those playlists public and point people to them. Or give your members a forum where they can request music for future classes!
Consumers are more eager than ever to make wellness a priority in their lives, and it’s up to you to create the most innovative ways for them to achieve it. We’ll be watching, and we’ll keep innovating to help you bring it to life, too.

2022 can absolutely be a great year for fitness business owners.
Trusted by the biggest brands

Leading wellness business enterprises in over 150 countries count on Mindbody to help them manage and expand their operations.
About Mindbody

Mindbody is the leading wellness experience software platform for the fitness, wellness, and beauty industries.
