PREMIUM BRANDED APP

Make your business stand out and elevate
your member experience.

SCHEDULE
CLASSES

PICK A
SPOT

TRACK STATS
& VISITS

AXLE Premium Branded App | With your custom branded app in their hands, your members can schedule classes, pick a spot, see their spin stats, and track their visits. And it all syncs flawlessly with the AXLE CRM.

Standard Features

Bring a Friend

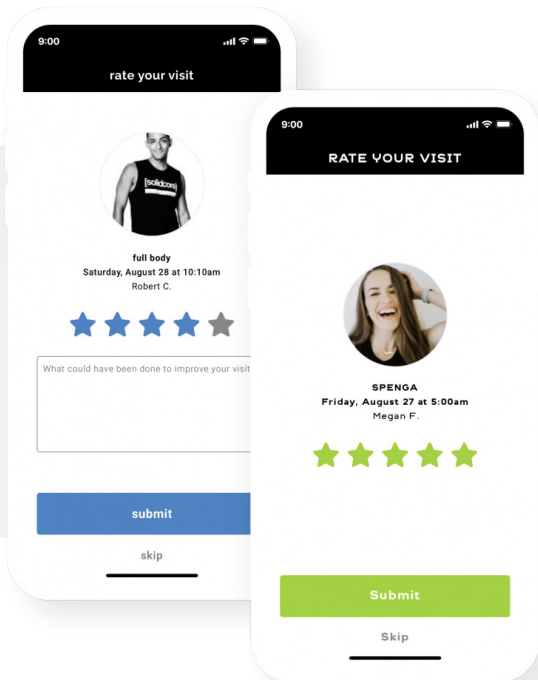

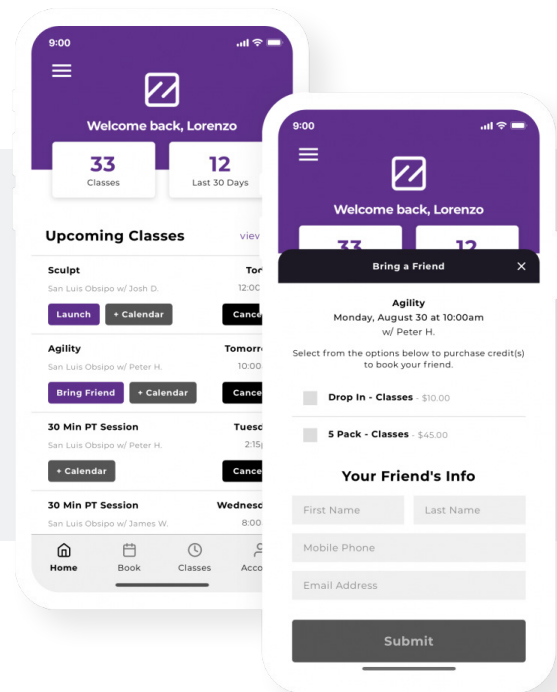

The ultimate lead generator is sharing the experience. Allow your members to bring a workout partner and easily book them using your members' available class credits.

Pick a Spot

Display studio layouts in the app so your members can pick their favorite spot before class. (We recommend by the fan.)

Customizable Pricing

Get complete control of the pricing page in your app. Adjust pricing for certain windows, run promos that only non-members can see, or highlight your current special.

Family Booking

Configure your app to let parents book for their children, partners book for each other, and more. No more signing in and out.

In-App Reviews

Collect valuable feedback from your members, trigger instant alerts, and create follow-up actions when needed.

Spin Stats

With integrations with FitMetrix and Performance IQ, bring spin stats directly into the app after a class.

PLUS Cross-Location Tracking, Product Sales, Push Notifications, Appointment Booking, and more!
