AXLE Talk Phone System | Call. Text. Track. With the Axle Talk system, your Mindbody clients are in the palm of your hand. Talk or text effortlessly, from anywhere. And it all syncs flawlessly with the AXLE CRM.

Standard Features

Contacts

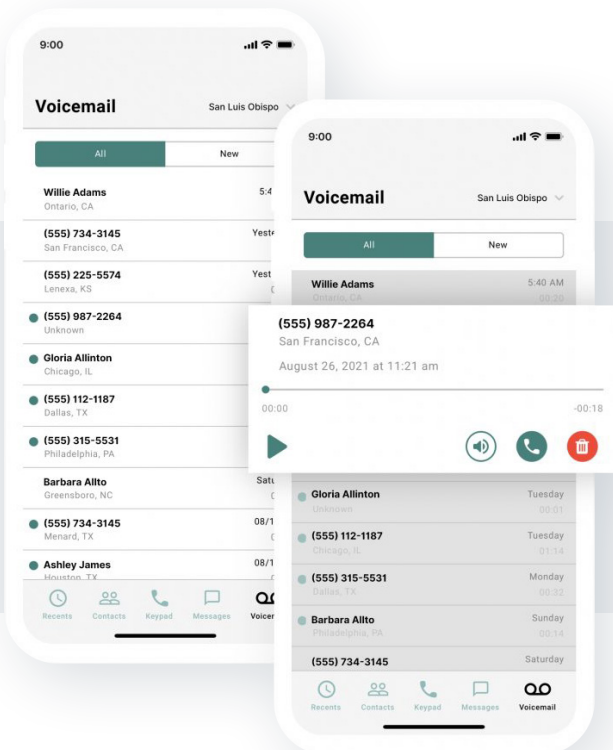

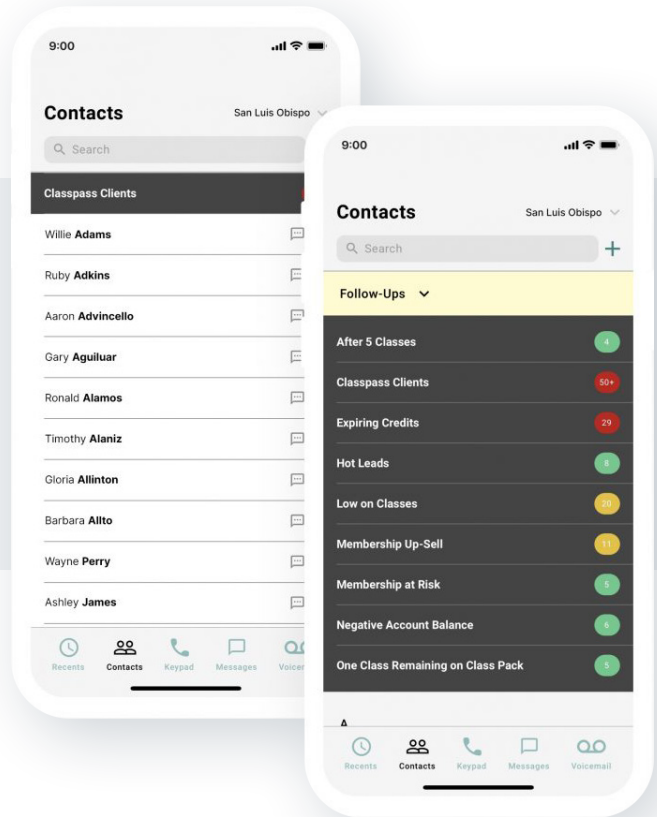

Streamline your communications with clients. The Mindbody + AXLE partnership helps you never lose track of a conversation.

Follow-Ups

From chasing Hot Leads to converting ClassPass Clients, AXLE CRM users can keep a close eye on outreach with Follow-Up buckets.

2-Way Texting

Threaded conversations keep manual texts and automatic texts in one place—where they belong.

Voicemail

Stored in the AXLE system, voicemails are accessible by everyone with an app login. At the studio or on the go, you can stay in the loop.

Log, Record, & Track Calls

Incoming and outgoing calls are stored in each client's profile. Number tracking tags the exact source of a call—great for ad targeting.

Remote Calling

Enjoy the full functionality of the AXLE Talk system from anywhere with your free iOS and Android app.

PLUS reliable call quality, global compatibility, phone number porting, multi-location support, and more!
