WHICH REPRESENTS

▼ **$659** in average lost revenue per month* (*without* Card Updater)

What does it do?

Card Updater maximizes your recurring revenue. When cards are tied to recurring payments, it works behind the scenes to keep them up to date —safely and securely—with no client outreach needed.
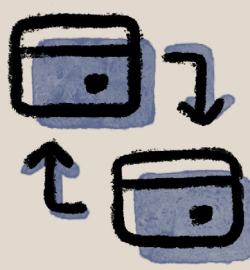

- **Automatically updates cards**—expiration dates, replacement cards, and billing information
- **Eliminates failed payments** from expired or invalid card numbers
- **Saves time for both you and your clients** by preventing countless emails and phone calls each month

How does it work?

Verifies that stored cards match what Visa and Mastercard have on file

Scans and updates continuously, before cards decline and payments fail

Provides ongoing, detailed stats in your Card Updater reports

We can't think of a more effective way to save time and money. Forget about updating cards and focus on health and wellness.
